

TAs will administer MEA online using a laptop or desktop computer. There are a few important settings to adjust before the day of the test. These include allowing certain websites within a browser's pop-up blockers. It is also recommended that TAs adjust power save/sleep settings during test administration.

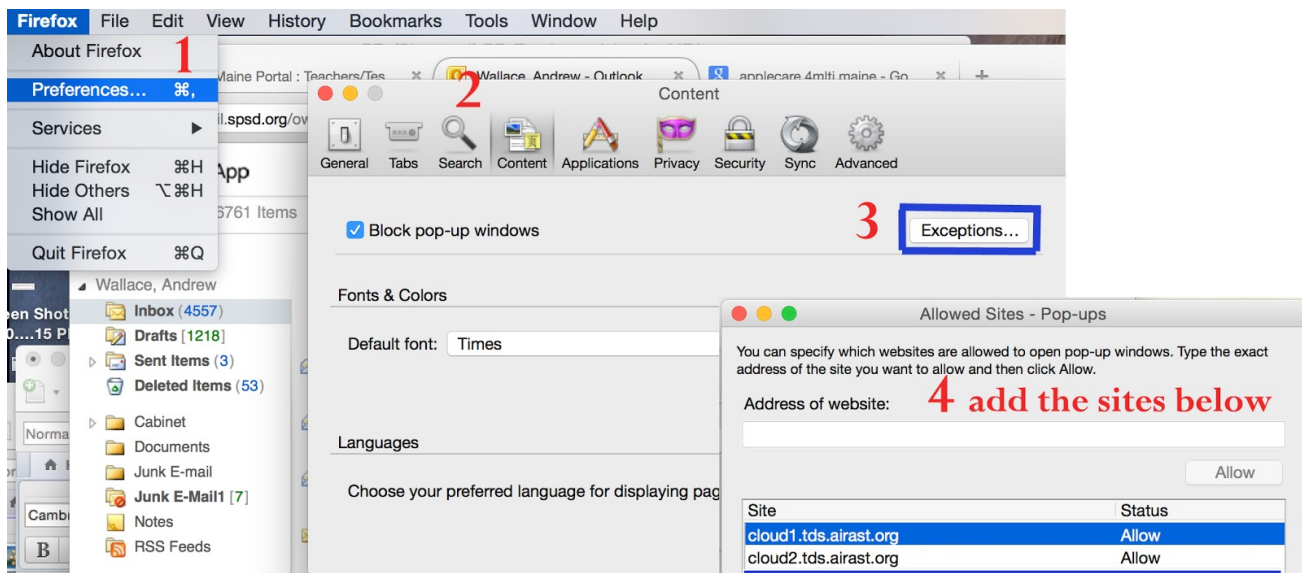

Changing Pop-up Settings for TA device

Please choose one browser that you will use for test administration.

Mozilla Firefox:

Add these to your settings: “cloud1.tds.airast.org” & “cloud2.tds.airast.org”

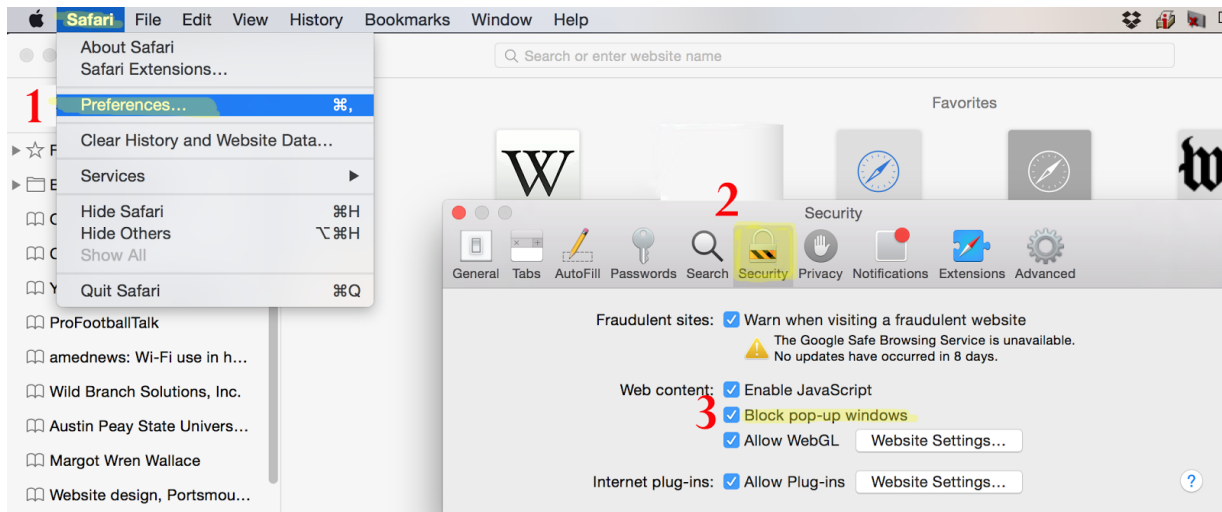

Click on Firefox → Preferences → Content → Exceptions → Type in cloud1.tds.airast.org & cloud2.tds.airast.org → OK

Safari:

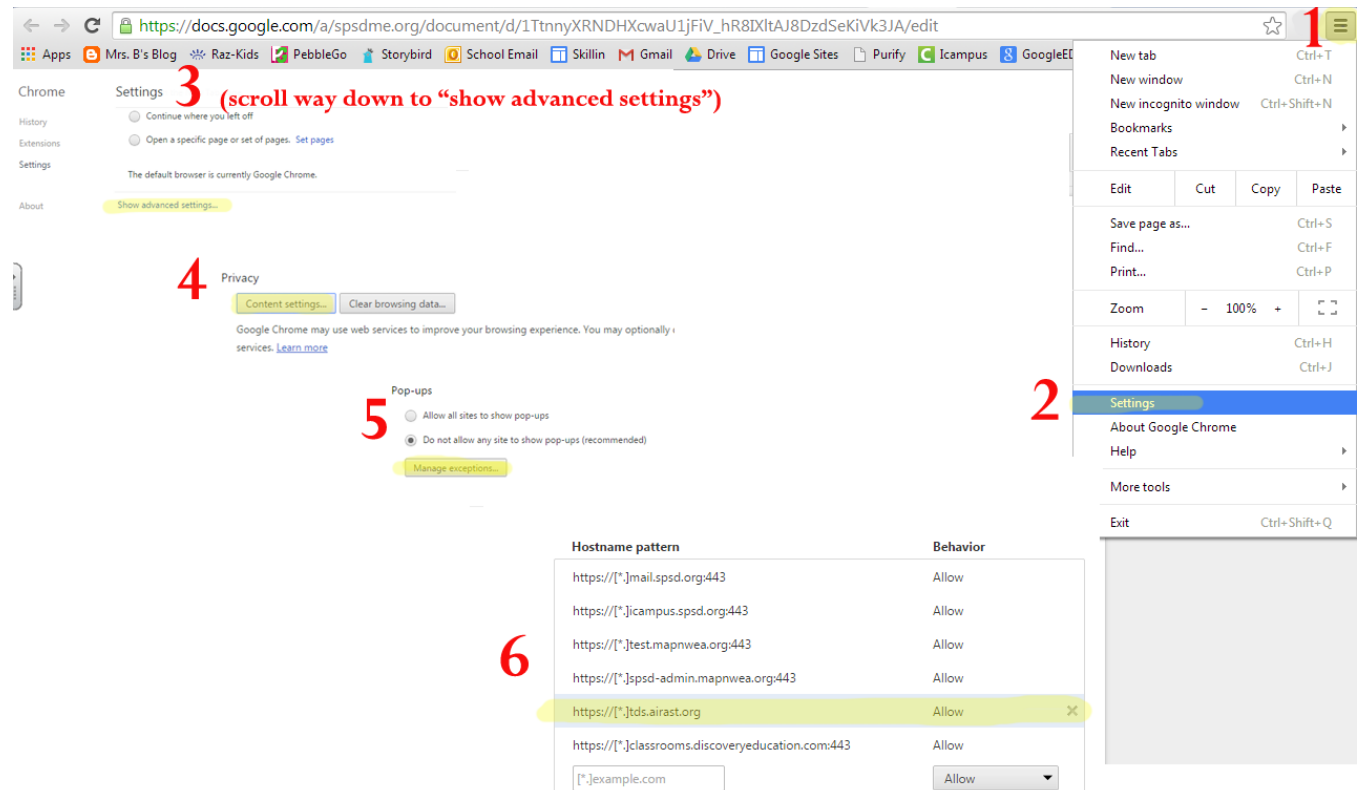

Pop ups are completely blocked or unblocked. If yours is blocked do this:

Safari → Preferences → Security → Uncheck Block pop-up windows → OK

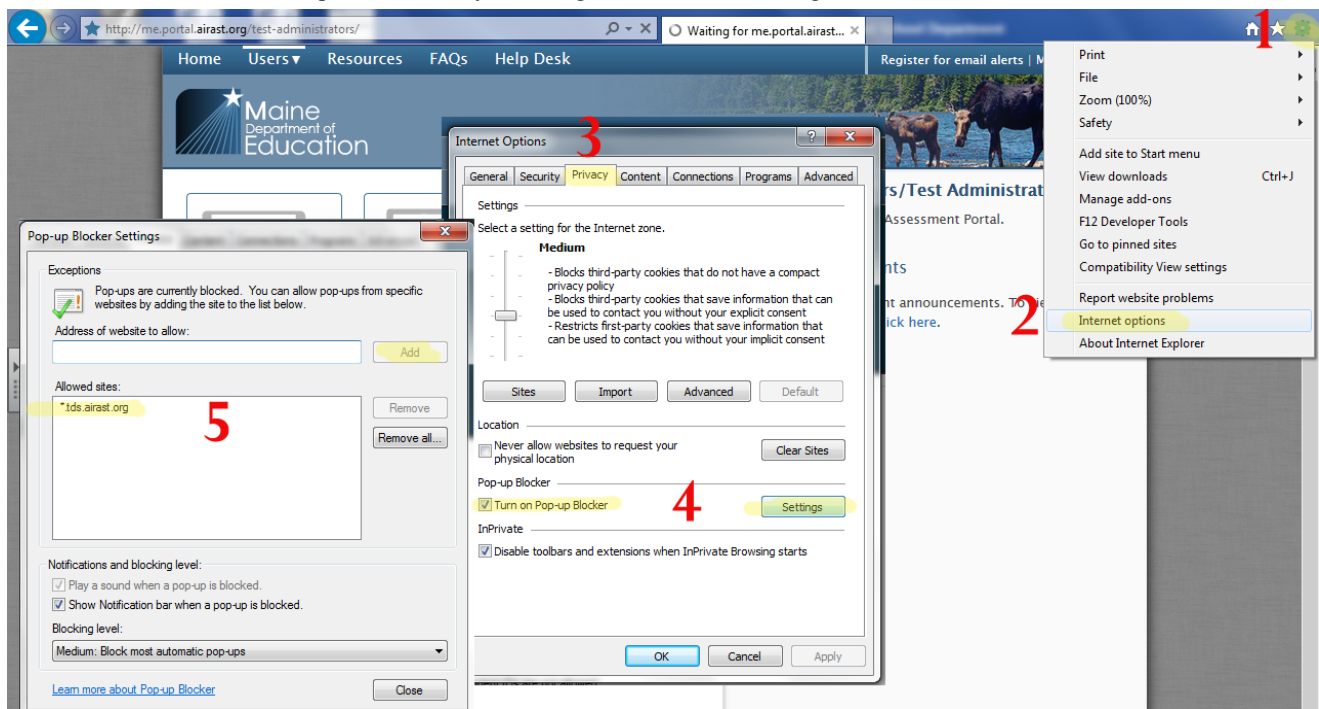

Chrome:

Chrome Menu→Settings→Show Advanced Settings→Scroll to Privacy→Content settings→Scroll to Pop-Ups→Manage Exceptions→add https://[*].tds.airast.org→Done

Internet Explorer:

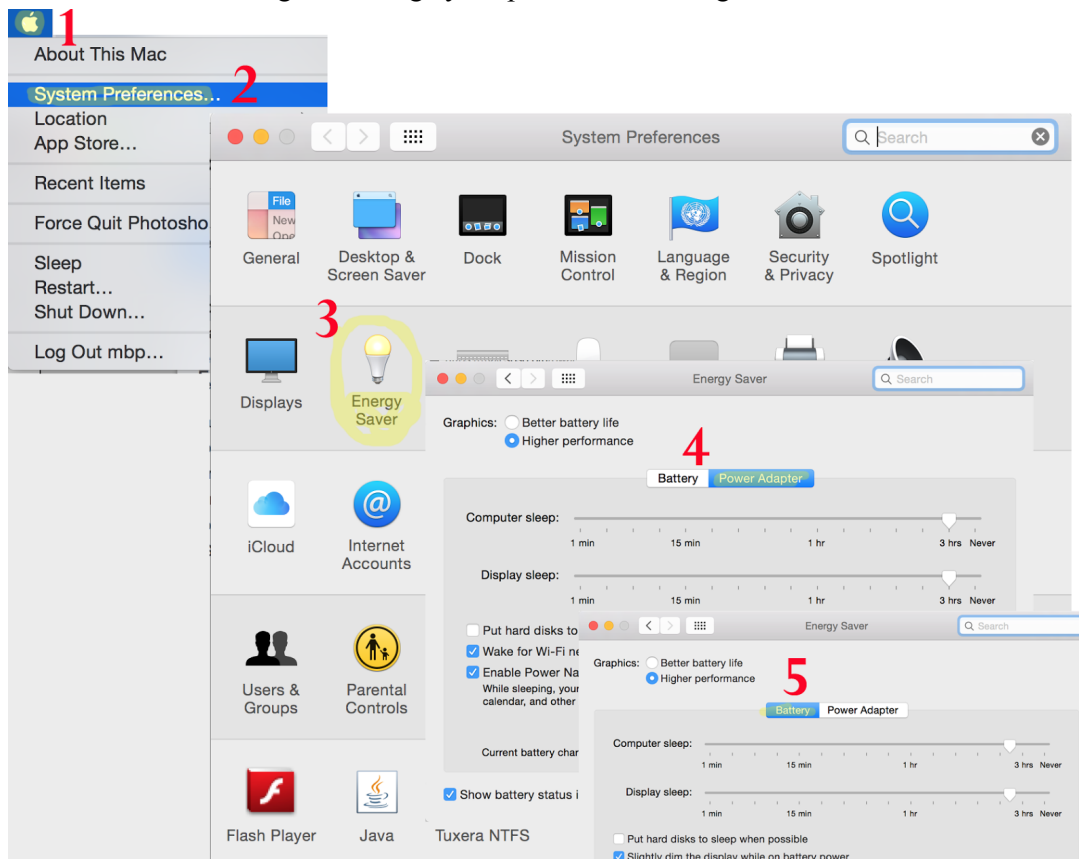

Click on the Gear→Internet Options→Privacy→Settings→Add *tds.airast.org→Close

Powersave:

Mac→Click on the Apple→System Preferences→Energy Saver→Power Adaptor→Change Computer sleep & Display sleep to 2 hrs. or more. →Then click on Battery→Change Computer sleep & Display sleep to 2hrs. or more.

Do not forget to change your power save settings once test administration is completed.

Windows→Click on the Start Menu→Control panel→ Hardware & sound→Power Options→Change when the computer sleeps→ Change Turn off the display to 2 hrs or more→Save changes.

Do not forget to change your power save settings once test administration is completed.
